Good things have been coming your way, your optimism is the key to your continued success. Do your best to stay patient and avoid impulse spending.

**Taurus - April 21st - May 21st**

Be cautious Taurus. Your story does not have a fairy tail ending. There is a dragon threatening your happiness. You have the patience and passion to prevail. Sleep with one eye open and good things will come.

You are nervous and tense. Take a class in Yoga, or treat yourself to a spa day. This will be the key to staying youthful and lively.

Letting go and being free might be the best answer. Leave the swinging to the dancers. Watch out for the cynical pink panthers.

Today Leo, you must love your life. Embrace the people around you and control your emotions. I urge you to use your creativity and start a new project.

It may seem that you walk in a land of chaos. Keeping things in order has made you fussy in old age. Remember to use your patience and creativity to maintain balance in this new decade.

You wear many faces. Remember to stay true to yourself and never forget where you came from.

This week may feel like constant rain. But you must seek shelter. Your friends are closer than you think. Let your feelings be heard.

**Sagittarius - November 23rd - December 22nd**

I encourage you to stick to routine. Finding order in your life will bring a new romance.

**Capricorn - December 23rd - January 20th**

Your moon is in Saturn, and your spaghetti is in retrograde. As you know a teacher wants all of its pupils to learn. Be fair to yourself and to those that you lead.

**Aquarius - January 21st - February 19th**

You are off the hook this month. Nothing you do will bring consequence. Create a bucket list and fly over green pastures.

**Pisces February 20th - March 20th**

This week marks a new beginning where some other beginning ends. It's closing time.
